

PRESIDENT OF TOUCHPOINT NETWORKS INVITED TO CONVENTION RESERVED FOR INDUSTRY LEADERS

Gary Gonzalez, President of TouchPoint Networks, to Share His Vision on the Future of Unified Communications

PORTLAND, OR — May 24, 2012 — TouchPoint Networks, a leading provider of unified communications, announced today that President, Gary Gonzalez, has been invited by Technology Assurance Group (TAG), an international organization representing nearly \$350 million in products and services in the industry, to share his vision on the future of unified communications with some of the industry's top manufacturers, vendors, suppliers and resellers at TAG's national convention. The 12th Annual TAG Convention will be held in New Orleans, Louisiana on September 9th-12th.

With more and more businesses headed to the cloud, networking and IT infrastructure has grown substantially more complex in the past year. Today's unified communications providers require unprecedented levels of technical expertise, industry foresight and customer service in order to remain competitive. TouchPoint Networks has been invited to attend this year's convention due to its superiority in each of these areas.

"TouchPoint Networks has dominated their marketplace for

quite some time," states Brian Suerth, Executive Vice President & Partner of TAG. "They are continually striving to stay on the leading edge of technology, and that's why no one can compete with them. TouchPoint Networks knows what's coming down the pipeline and how it's going to ultimately affect their customers. That's why they are able to proactively support their customers and implement powerful technologies before their competitors even realize that they're behind the curve."

Several industry topics will be covered at the convention and best business practices will be revealed in areas ranging from cloud technologies, virtualization, hosted solutions, managed IT services to customer service. "The only constant in life is that it never stops changing. It's no different in our industry," commented Gary Gonzalez, President of TouchPoint Networks. "That's why we continue to remain active in the industry and share our views at these kinds of events. We always come back to the office with something new and valuable that we can pass on to our customers. We're passionate about what we do and we feel that it's our duty to our customers to find out what's on the horizon. We're often able to leverage new developments and

find ways to boost our customers' productivity, and more importantly, their bottom line profitability."

TouchPoint Networks is among the top unified communications providers in the nation and its success is due largely to its innovative approach to business.

ABOUT TOUCHPOINT NETWORKS

Gary Gonzalez and his business partner's Chuck Whiteley and Tamara Gonzalez, are owners of TouchPoint Networks, a member of the Technology Assurance Group (TAG). TouchPoint has built a team of professional voice and data specialists dedicated to the highest levels of customer support. TouchPoint's pattern of steady growth reflects their commitment to keeping pace with the constantly evolving telecommunications technology arena, and the dramatic expansion of the Pacific Northwest's business market. With offices located along the I-5 Corridor in Portland, Eugene, and Medford, TouchPoint Networks is uniquely positioned to respond quickly and effectively to a wide range of customer equipment and service requirements.
