TouchPoint Networks Helps Business Owners Capitalize on 2025 IRS Section 179 Tax Savings

Leading Managed Technology Services Provider Urges Companies to Maximize Year-End Investments Before December 31

PORLAND, OR – November 21, 2025 – TouchPoint Networks, a leading managed technology services provider (MTSP), is encouraging business owners to take advantage of the 2025 IRS Section 179 tax deduction, which allows companies to immediately expense qualifying technology and equipment purchases. For 2025, businesses can deduct up to \$2,500,000 on eligible purchases such as servers, IT infrastructure, cybersecurity, software licenses, and phone systems that are placed in service before December 31, 2025.

“Section 179 remains one of the most effective ways for businesses to invest in growth while simultaneously reducing taxable income,” said Gary Gonzalez, President at TouchPoint Networks. “While we’re not tax professionals, we view it as our responsibility to help our clients make smart financial and technological decisions that strengthen their operations.”

Many organizations mistakenly wait until the last

quarter to consider capital upgrades, but TouchPoint Networks emphasizes that early planning ensures businesses can implement new systems and claim the full deduction. “Each year, we see companies leave money on the table simply because they didn’t act fast enough,” Gonzalez added. “This deduction can make a real difference in profitability by freeing up capital for innovation and security investments.”

The Section 179 program allows 100 percent depreciation on qualifying equipment, provided it’s operational by the end of the calendar year and used over 50% of the time for business purposes. With the continued rise in cyberthreats and digital transformation, TouchPoint Networks notes that the timing couldn’t be better for companies to modernize their infrastructure.

TouchPoint Networks advises all businesses to consult with a CPA or qualified tax advisor to determine how much they can deduct under the updated 2025 guidelines.

ABOUT TouchPoint Networks

TouchPoint Networks is a leading technology solutions

provider that partners with businesses to implement cutting-edge networking and IT infrastructure, unified communications, VoIP, cybersecurity, business continuity, video surveillance, and cloud solutions. We deliver these services through a proactive managed service model, ensuring that all critical business systems maintain high availability, security, and optimization.

With over 20 years of experience, TouchPoint has built a strong reputation for designing, implementing, and supporting solutions that help our business partners achieve their goals. We have been recognized for outstanding performance by several top manufacturers and industry associations.

Our credentials, combined with our membership in the Technology Assurance Group, have enabled TouchPoint Networks to grow and establish partnerships with businesses throughout Oregon, across the United States, and globally. We operate three offices along the I-5 corridor in Portland, Eugene, and Medford.
